

Title of the talk

Speaker's name

Affiliation

elixir-europe.org

Thanks for using the ELIXIR slide template

These slides facilitate a consistent look and feel to how ELIXIR presents internally and externally.

- ELIXIR theme colour, font (Open Sans) and font size for the slides are pre-set
- Please avoid moving the placement of Heading and Content text boxes. If your content doesn't fit in the text box, please try to minimise it or break into two slides.

Heading
An optional subtitle for extra context

- First-level bullet — recommended font/size: Open Sans, 22pt
  - Second-level bullet — 20pt
- Use **bold**, **a highlight span**, or **a mark tag** to emphasise text in orange
- Links are styled automatically, e.g. elixir-europe.org
- Keep to one idea per slide; split into two slides if content overflows

A sub-heading

Use a level-3 heading for a secondary grouping of content within a slide, when a full new slide isn't warranted.

Divider slide –
this slide can be used as a signpost to divide topics in a talk

Callout boxes

Combine `.box` with a colour modifier to draw attention to supporting information.

Use a blue box for neutral supporting information — a definition, a caveat, or background context.

Use an orange box to flag a **key takeaway** or call to action.

Multi-column layout

Columns share the available width equally by default.

Notes

- First point
- Second point

Notes

- First point
- Second point

Multi-column layout with an image column

Add `img-col` to a column that should size to its content instead — e.g. one holding an image.

Notes

- First point
- Second point

Table example

Header 1	Header 2	Header 3	Header 4
text			
text			

Source: small print, e.g. for a citation or data source, goes here.

Slide with an image

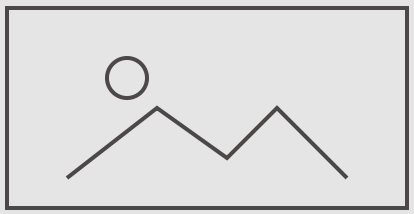

Image placeholder

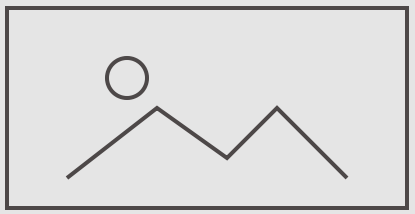

Image placeholder

Keep photos/images to the inner portion of the slide to ensure the visibility of the ELIXIR logo on the bottom right. Add the `boxed` class (right) to frame a photo or screenshot.

Heading

- For larger photos and images, please use this slide layout without the ELIXIR logo on the bottom right

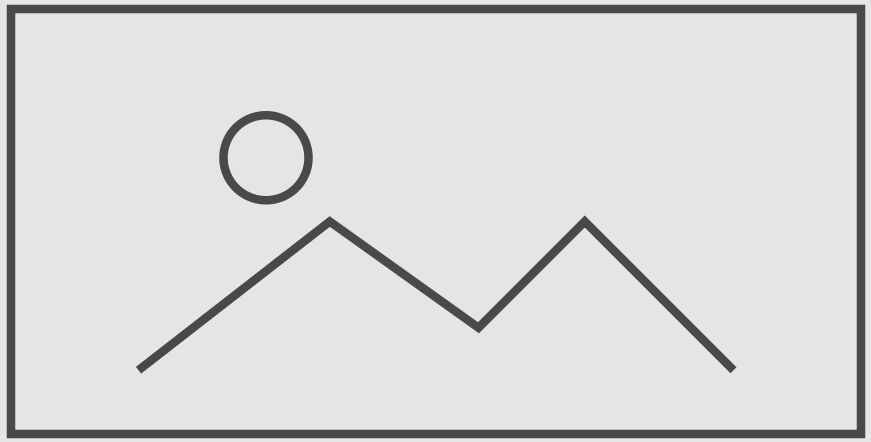

Image placeholder

Thank you
